Claims 1 to 5

Documents 1 and 2 disclose press belts with lands and water drainage grooves that have been arranged in an alternating manner, wherein the portions of the upper surface of a land that constitute a boundary with a water drainage groove have been given a sloping form by means of beveling or the like. However, the documents in question do not disclose or suggest a configuration wherein the upper surfaces of the lands have a projecting form, the entire surface of which is curved.

Meanwhile, document 3 discloses a configuration wherein the upper surfaces of the lands have an entirely curved form; however, said document only presents inventions wherein the upper portions of the lands have a recessed form.

The form of the upper surfaces of the lands on a press plate are closely associated with the functioning

of the press plate, and thus configuring so that the upper surfaces of the lands have a projecting form, the entire surface of which is curved, cannot be considered to be a simple design matter. Such being the case, the inventions set forth in claims 1 to 5 involve an inventive step in relation to documents 1 to 3.
